

INDUSTRIAL HEAT EXCHANGER

V SERIES

Multitube. Non removable tube bundle.

INDUSTRIAL LINE

Designed both thermal and mechanically to ensure long life and high reliability.

OPERATION

Standard V Series models consist of a tubular bundle within a shell. The product flows through the inner tubes while the service does it through the outer channel.

APPLICATIONS

The V Series is designed for heating or cooling fluids such as water, glycol, CIP solutions or sanitary water, among others. Being manufactured against stock and having a compact size allows to be a quick and economical solution.

ADVANTAGES OF CORRUGATION

HYGIENIC PROFILE

DIFFERENT CORRUGATION GEOMETRIES (HARD/SOFT/PLAIN)

TURBULENT FLOW (LOWER REYNOLDS NUMBER THAN FOR SMOOTH TUBES)

HIGHER HEAT TRANSFER COEFFICIENTS
AND LOWER EXCHANGE AREA

HOMOGENEOUS THERMAL TREATMENT

LOWER FOULING

SHORTER RESIDENCE TIMES

LONGER RUNNING TIMES

ADVANTAGES OF TUBULAR HEAT EXCHANGER

LOW MAINTENANCE COSTS

HIGH WORKING PRESSURES

HIGH

WORKING TEMPERATURES

PROCESSING OF PARTICULATE •
OR FIBRE PRODUCTS

EASY INSPECTION AND DISASSEMBLY

HIGH SECURITY IN ASEPTIC PROCESSES

EASY TO ENLARGE

STANDARD DESIGN CONDITIONS

Design temperature

180 °C

Design pressure

10 barg

For higher design pressure or temperatures as well as hazardous fluids, the heat exchangers can be checked according to AD 2000 Merkblätt, ASME VIII Div.1, PD 5500, EN13445 or by Finite Elements Analysis and CE certificated by individual inspection modules.

* Included: 3.1 Quality certificate and CE Marking according to 2014/68/UE.

AVAILABLE CONNECTIONS
